I do hereby retract from my two statements-

1. *Below Statement made in Paper named “Carbon Based Gases in Our Atmosphere” Published in Quest Journals, Journal of Research in Environmental and Earth Sciences Volume 11 ~ Issue 11 (November 2025) pp: 32-34 ISSN(Online) :2348-2532*

‘Rig based industries’ are the root cause of Un-natural way of using Global natural resources. They are cause of external environmental changes. At the same time, they are disturbing natural flow of liquids under the Earth’s surface by sucking the Liquids out from Capillaries of the Earth. This phenomenon is similar to sucking of blood from Human body by a Mosquito. Mosquito is a naturally occurring living thing & it sucks sap from plants & blood from animals for its survival, as needed by its digestive system.

This means that infect there is no need for ‘Travel & Transport’, which require resources other than Live stocks.

The Rig industry creates holes into the Earth’s surface, leading to outflow of its body plasma. These holes also contribute to contamination of Earth’s internal system by inward flow of external liquids, like chemicals & unfiltered water inside the Earth’s body. Far beyond this, a very high level of damage to the Earth’s internal Capillaries is being done by FRACKING. Fracking is being carried out using various means, including- hydraulic, chemicals, detonators & even nuclear blasts. This kind of heinous acts are leading to conversion of plasma carrying finer capillaries inside the Earth’s body into internal reservoirs. This is the greatest kind of crime Humanity can do & it is being done at a very large scale.

2. *Below statement made in Paper named “Governance (Revised)” Submitted to Journal of Hindi, Political Science and Home Science (www.questjournals.org) on 17 December, 2025*

Use of Machinery based or Motorised means of transportation should be out of reach for everybody, excluding Members of council of Saints, Rulers & Researchers. Such facility should only be available for conduct of their respective official work.

The above Statements are hereby replaced by below Statement-

Planet Earth is a form of a Comet & hence it is beyond any kind of biological life, as exists in the form of Plants or Animals. But it has seeds of all kind of life & it is the sustainer of all kind of life.

We Human beings, as a responsible society, should utilize Natural resources in such ways that prospects of any kind of present or future life are not harmed by our acts.
